FIRST YUGOSLAV JET-PROPELLED AIRCRAFT

Comment: The announcement that Yugoslavia had test-flown its first domestically-produced jet-propelled aircraft in late 1952 was given considerable publicity in the Yugoslav press.

Information on graphics material is appended.

On the basis of plans made by designing engineer Maj Dragoljub Beslin, a Yugoslav aircraft factory has produced the first jet-propelled aircraft to be built in Yugoslavia (1). The aircraft was test-flown in the fall of 1952 by test pilot Capt Tugomir Prebeg (2), of the Yugoslav Army, who verified information disclosed thus far that the aircraft is extremely strong and maneuverable and is comparable in quality and characteristics to the most modern types of jet-propelled aircraft (3). The aircraft is now in the testing stage and is being used as an experimental aircraft to test and verify the accomplishments already achieved in this field of aviation. The results obtained have fulfilled the expectations of the designer and the factory (1).
